

**GÜNTHER**

Press release 11th December 2020

## 2.000.- Euro donation for Kompass Leben –

*Anlagenbau Günther GmbH ends the turbulent year 2020 with a positive attitude, good thoughts and appreciation of the work of Kompass Leben e. V.*

Handover of the donation check f.l.t.r.: GÜNTHER: Felix Wohlfahrt, Andrea und Bernd Günther; Kompass Leben: Frank Haberzettl, Thomas Henning, Andreas Hansel

For more than 20 years now, Anlagenbau Günther GmbH in Wartenberg has been co-operating with the institution Kompass Leben in Lauterbach. GÜNTHER is a manufacturer of special screening machines used in the recycling industry. For this purpose, the employees of Kompass Leben equip shafts with sieve stars, which are then assembled as a sieve deck in the machines. A total of over 40.000 finished screen shafts have already been equipped with around 50 components each and delivered to GÜNTHER from the workshop in Lauterbach.

„It is precisely this figure that shows how many shafts we need to manufacture our machines. We are pleased that this outsourced production step concurrently supports the workshop“, says GÜNTHER Managing Director Bernd Günther. „The assembly of the shafts is a work that fits well into our workshop and we are pleased that we have established a long-term collaboration“, adds Thomas Henning, Workshop Manager of Kompass Leben.

„Right in time for christmas, the GÜNTHER management handed over a donation check to Kompass Leben. Through the Corona crisis we intensively noticed what, besides the recycling technology, we are especially good at: Finding solutions together, make arrangements and compromises and consider the common welfare. Again and Again this year the solidarity and appreciation of our fellow human beings came to the fore. With this good thought we want to end this extraordinary year 2020 and support the institution with a donation.“ Mr. Haberzettl, member of the management of Kompass Leben e. V., expressed thanks for the donation, which will be used in the upcoming projects next year.
